Social and Behavioral Sciences

Research Master

School of Social and Behavioral Sciences

Research Master Social and Behavioral Sciences

The Research Master Social and Behavioral Sciences is a two-year English taught program wherein you will follow state-of-the-art courses and be involved hands-on in research of your lecturers. The Research Master offers one major: *Individual in Social Context* and three minors: *Social Psychology*, *Social Sciences*, and *Methodology and Statistics*. The program integrates social psychological, sociological, organizational, and methodological perspectives, and is the only Research Master in The Netherlands that offers this interdisciplinary view on social behavior.

The Research Master's program provides talented young researchers from all over the world with the tools they need to conduct fundamental scientific research in the Social and Behavioral Sciences. The best researchers and research groups the Tilburg School of Social and Behavioral Sciences has to offer, participate in this program.

Prof. Klaas Sijtsma

Professor of Methodology and Statistics,
Program Director Research Master,
Vice Dean of Research Tilburg School of
Social and Behavioral Sciences

"Welcome to the Research Master of the Tilburg School of Social and Behavioral Sciences. You have just hit an intensive, high-quality program that will train you to become a broadly oriented researcher in Social Psychology (including Economic Psychology), Social Sciences (Sociology or Organization Studies) or Methodology and Statistics. This Research Master offers you a unique perspective on social and behavioral science research, nowhere else to be found inside or outside the Netherlands."

MAJOR INDIVIDUAL IN SOCIAL CONTEXT

The major Individual in Social Context focuses on individual behavior in three types of social contexts; *social psychology*, *sociology*, and *organization studies*. Each context is studied separately, but also in connection to the other contexts. The major offers three different content courses, two statistics courses and a skills course. In the first year, all students start with the major Individual in Social Context. Students choose one of the three minors at the moment of application. More information: www.tilburguniversity.edu/master/remasbs/major

MINORS

Students specialize in an area of the social and behavioral sciences by choosing one of the three minors: *Social Psychology*, *Social Sciences*, or *Methodology and Statistics*. All minors have the same structure, but offer courses that are specifically tuned to the particular minor. Each minor offers four content courses and one specialized statistics course. A large part of each minor consists of research skills and activities: students learn everything there is to know about doing scientific research by means of a hands-on approach. This entails taking part in research of the research groups involved in the research master and doing your own research supervised by a researcher. More information: www.tilburguniversity.edu/master/remasbs

ADMISSION REQUIREMENTS

Students must apply for enrolment in the program. Admission takes place after selection. Successful candidates hold a university Bachelor's or Master's degree in Social Sciences and must have a good academic record. More information: www.tilburguniversity.edu/master/remasbs/admission

CAREER PERSPECTIVE

After completing the master's program, students will be sufficiently skilled to find a high-level research position outside the university or to enter a PhD program at Tilburg University or another university. More information: www.tilburguniversity.edu/master/remasbs/career
