26 – 30 July 2010

Course director: *Wolfram Neubauer*, Director ETH Zürich Library, Switzerland

Module 1: Strategic Developments and Library Management

Monday 26 July

After a keynote on strategic developments in scholarly information, speakers focus on libraries' return on investment, supporting the institution's strategic goals, and research assessment.

Module 2: The Library in the Scholar's Workflow and Research Data

Tuesday 27 July

Morning sessions discuss data-intensive science, data management and re-use. The scholar's workflow and research support services are examined in the afternoon.

Module 3: Libraries - Partners in Teaching and Learning

Wednesday 28 July

After an introduction on the joy and responsibility of teaching well, lecturers address 21st century literacies, web (or video) lectures and physical learning spaces.

Enrich students' learning experience

What is your library's return on investment?

Module 4: Mobile Technologies in Education and Libraries

Thursday 29 July

First, the use of mobile technology by teens and young adults is sketched. Then, speakers address the use of mobile technology (including e-readers) in teaching, learning, and libraries.

Module 5: Web 2.0 and Linked Data in Libraries

Friday 30 July

After an overview of Web 2.0 developments, lecturers discuss user-centred design of next generation library systems, semantic web and linked data, and Open Annotation.

Get a grip on 21st century literacies!
