

Weighted fees for Pre-master's programs 2021-22

Students, who are not yet admissible for a Master's program, need to remove their deficiencies by passing exams for courses the Examination Board has determined in a pre-Master's program.

The weighted fee that you pay, applies only to the credits (European Credit = EC) pertaining to courses that form part of your pre-Master's program and for which you are enrolled, for the duration of one academic year. The number of EC is listed in the admission letter you received from the school.

The amount of the weighted fee is the same for EEA students and non-EEA students alike.

You are only allowed to follow the courses the examination Board has determined. If you wish to follow other subjects alongside your pre-Master's programs, then as part of the pre-Master's program, you need to register as a [contract student](#). You pay for every 6 EC the statutory fee in proportion: € 217 (2021-22) for each 6 EC (plus €52 administration costs). Please apply at the [Student Desk](#).

After these rates were determined, the government decided to reduce the fees for 2021-22 because of the Covid-19 pandemic. See the reduced fees in the scheme below.*

PLEASE NOTE:

- In case you should end your enrollment before August 31, you do **not** get a refund of (part of) the weighted fee. You always need to pay the full weighted fee, regardless if you finish the academic year or fail your exams.
- If a student has completed his pre-Master's courses and enrolls directly afterwards in the same academic year for a Master's program, his or her enrollment for the pre-Master's program will be terminated automatically.
- It is *impossible* to go on exchange as a pre-Master's student
